Each finger gets special attention, being massaged upward towards the eye. Following the fingers, as though attempting to reach more than an octave up a scale, is another excellent exercise. This should be done 10 times with each hand.

After the massage and exercise in a good linen or a soft quality of crease suits the hands, and on cotton gloves and tie the rest of the evening. This will be good if the hand skin appears to be rough.

Every woman, of course, has her own lines on a former's forehead. They may be made less noticeable by the use of make-up, but the patient is apt to over-stimulate, leading to a more serious condition. It is best to avoid the use of make-up on the forehead, and to use a good quality of cream on the forehead, and to use a good quality of cream on the forehead, and to use a good quality of cream on the forehead.

LETTERS to the EDITOR

Dear Sir,
I am writing to you on the subject of the paper's news, and in this, the correspondence name and residential address should be given even if the letter is to be published.

A Battle of Logic
Concerning Money

By the way, I would point out that a paper reporting news of a battle of logic concerning money is a bit of a paradox. Logic is a science of reasoning, and it is not a subject that can be argued about in the same way as a game of cards or a game of chance.
