ChAPPED HANDS

The hands which are so important in the work of the housewife, should be kept soft and supple. This is the only way to prevent chapped hands, which are so common in the winter months. The hands should be kept soft and supple by using a good hand cream. This is the only way to prevent chapped hands, which are so common in the winter months.

NEW SEASON STORE CATTLE OFFERED
Hogget Market Slightly Easier
PEAK RATES MAINTAINED FOR PIGS AND POULTRY
 Around The Saleyards

(By AGRICULT.)
 One of the features of the sales throughout the district this week was the improved quality of beef cattle brought forward. This week saw the commencement of a new season for store cattle of Valderia over 2000 head being offered. Included among them were some splendidly forward and well finished store steers and calves, and a number of well bred heifers.

Buyers from outside districts are beginning to operate more freely at the district markets, making large quantities in all sections.
 The market for the new season's store cattle opened at a lower level than was evident at the beginning of the marketing season. For two-year-old steers and young heifers, buyers were keen to purchase in private lots.

There was a restricted demand for the best quality of calves. These calves were in good demand, but the market was not so active as it was some time ago. The market for pigs and poultry was very active, and prices were maintained at a high level.

The market for sheep was also active, and prices were maintained at a high level. The market for horses and ponies was also active, and prices were maintained at a high level. The market for swine was also active, and prices were maintained at a high level.

The market for poultry was also active, and prices were maintained at a high level. The market for eggs was also active, and prices were maintained at a high level. The market for butter and cheese was also active, and prices were maintained at a high level.
