SUCCESSFUL LABOUR DAY BALL HELD IN WAIWAPA

Grand Finale To The Celebrations During The Day

As a grand finale to the Labour Day celebrations in Waikanae on Monday, a fancy dress ball was held in the Municipal Theatre in the evening.

The decorative scheme combined red, white, and blue, features of flag crossing and accentuating the colouring of the ball.

Prizes were given for the dancing, which was played to Mrs. Henry's orchestra, and a complimentary supper was served to the guests.

The fancy dances were many and varied, and presented a kaleidoscope of brilliant colour as the dancers took part in the Gaiety Show.

GREEN GRASS DRIED BY HOT AIR VALUES RETAINED

Experiments Prove Successful

Dr. C. M. Aitken, a celebrated expert of the University of New Zealand, has announced that he has proved that green grass dried by hot air retains its nutritive value for a year or more, and is as good as fresh grass.

The process is simple and can be carried out on a small scale by any farmer. It involves drying the grass in a hot air oven, which can be made by using a boiler and a fan.

Dr. Aitken's experiments have shown that the dried grass is as palatable to cows as fresh grass, and that it is just as nutritious.

The process is particularly valuable in areas where the growing season is short, and where the grass is often cut before it has reached its maximum nutritive value.
