Supernation and Health Insurance Committee Faces Big Task

From the Parliamentary Debates, March 7. It is the hope of the Prime Minister that the present session of Parliament will close on Wednesday, March 21. With a view to expediting the business of the House, the session will be closed at an earlier hour than usual by the adjournment of the House on Wednesday, March 21.

Mr. Savage said in an interview following the adjournment that he would bring the session to a close as soon as possible. He said that the Parliamentary Committee, which would be set up to deal with the Health Insurance Bill, would be able to start work on the bill as early as possible. It was his hope that it would be possible to bring the bill to a second reading by the end of the session.

DETECTIVE WORK FOR DERMATOLOGIST
 Skin Diseases are Not The Simple Things They Seem
Causes Often Extremely Obscure

The modern dermatologist who has to deal with the skin diseases of the very commonest form, eczema, is often surprised to find that the cause is not what he would expect. It is often a matter of hours before the cause is discovered. In one case, a patient who had been suffering from eczema for several years, was found to have a very rare form of the disease. The patient had been using a certain kind of soap, and it was found that this soap was the cause of the disease. The patient had been using the soap for several years, and it was not until the dermatologist had examined the patient's skin for several days that the cause was discovered.
