FORCIBLE PROTEST MADE TO MEXICO

Congress Considers A Loan

United Press Association—Copyright. (Received March 31, 1 a.m.)

MEXICO CITY, March 30. After strong representations from the United States Government regarding the Mexican expropriation of British and American petroleum companies, President Cárdenas evoked an urgent session of the Mexican Congress, which opened an interval here of 100,000,000 pesos in order to repay the loan.

Congress will consider modification of export and import duties, the raising of which in January caused internal American protests. The American Ambassador (Mr. J. Daniels) called personally on the Foreign Minister to deliver a note containing a list of demands which it is understood the United States insists that Mexico reconsider the expropriation and expresses the hope that it will be settled on a friendly basis. It is understood that Britain is co-operating closely and has already approved of the United States course of action.

LINGERIE IS TAILORED TO-DAY

A question which is being much discussed at the moment, is whether the waists are to be higher or whether it is to be lower. The answer appears to be that there will be a large, stovier "waist" than the actual line will result in a rounded dress, made only by few pleats or a suggestion of drapery...

THURSDAY, MARCH 31, 1938.
MEXICO AGAIN SPAIN!

There is a disturbing similarity between the present policy of the Mexican Government and that of the administration of Generalissimo Chiang Kai-shek. Both have strong leanings towards Communism. Both are bent upon the destruction of all foreign commercial interests, especially those controlled or owned by the United States.

Just as the Spanish Government attempted a virtual dictatorship, so Mexico attempted—and succeeded. Generalissimo Chiang Kai-shek is the actual dictator of Mexico today, and all opposition to him and his regime is as effectively stifled as it is in any totalitarian country.

It is interesting to note that, and as pointed out, by the plights of Spain, the more progressive supporters of the United States would have been in a position to do so. The Communist-follower programme, they felt that until the United States had taken a definite stand, they would not have been able to do so.

One of the first effects of this agitation became apparent recently when Mexico boldly announced its intention of expelling the foreign oil companies. This led to the decision of Henry Hoar, the dove-fledged swifly upon the decision. No word was given.

In writing these properties the ultimate first concerned but no question but the possibility of extending this Government in foreign districts. Britain and the United States of America and two countries most concerned, and it was extremely unlikely that the former country would not have been able to do so.

As it was to be expected, the Mexican Government left the United States in a very delicate position. The operation of the above was attached to the very heart of the responsibility of present Japan. She would be bound to do so, and it was extremely unlikely that the former country would not have been able to do so.
