Germany and the Empire
A correspondent to this day's "Daily Mail" says that he has found a note which is quite opposite to the "friendly alliance" of the British Empire, France, and Russia.

Until the end of September, Czechoslovakia was one of the few countries left in Europe. Admirably, the German ministry had its programme, but it was not a shadow of the real thing.

The position of Great Britain seemed dire. France was left a powerless ally. Russia, a member of the League of Nations, had not even been invited to the League.

There is not the slightest ground for branding Germany the aggressor. It is not Germany that has broken the peace and had long totalitarianism can exist only as long as it is not the aggressor.

On September 20, there came an announcement from Berlin. Germany's threatened attack. This was the beginning of the end.

Through Belgium to the Netherlands, to the Low Countries, to the Channel, to the North Sea, to the Atlantic.

LIFE ON DEVIL'S ISLAND

THE MACABRE HISTORY OF FRANCE'S NOTORIOUS PENAL SETTLEMENT

It was recently announced that France had decided to abandon Devil's Island as a penal settlement. Though a later version stated that the decision had been revised.

Devil's Island, France's remote penal settlement, was the scene of some of the most macabre and notorious crimes in the history of the world.

Strange French Law
The more we observe and strange laws exist, that a man who has been sentenced to death by a French court can be reprieved.

Many Attempts at Escape
One of France's most notorious prisoners, who had been sentenced to death, made several attempts to escape.

Story of Four
A Frenchman who had been sentenced to death, made several attempts to escape from Devil's Island.

Prisoners
The prisoners of Devil's Island were treated with a mixture of cruelty and indifference.
