PREPARATIONS FOR SPINNING—Workers in a London factory of Crompton have a rayon composite—manufacturing combs for Rayon viscose in spindles. From all parts of the world comes a great demand for this product, and this factory works every inch of the gear for the new season.

LARGEST SEEN IN THE DOMINION—A model of the H.M.S. Gordon, the H.M.S. Gordon class vessel which entered the Dominion Australian fleet last year. The model, which is 100 ft long and complete in every detail, is the largest one in New Zealand. It is the case of Hastings.

THE WEAVERS OF AUSTRALIA—From the remote out-back districts of the Commonwealth vast quantities of wool are washed or combed by hand in the main parts. At this time of the year uncombed stations and communications centres become extremely busy, and scores of men are brought from hundreds of miles to handle the clip. Here a new rapid activity is a certain part of Queensland during the wool season.

A DELICATE OPERATION—The 100 long model of the Gordon is in place over preserving wire still within its handling when it is placed in the window of the New Zealand at Hastings port.

ARMED GUARDS PATROL THE BAYS OF THE BAYVILLE CHANNELS—Special provisions are being taken to protect the British Fleet. Greater security is being given to each of the bays. The special armament includes Mr. Chamberlain's house and surroundings.
