BOOK LOCKS—By their silent expressions these readers in the Hastings Public Library reveal the seriousness of the task of choosing "something to read." The small silver shelves give them plenty of scope.

AT YOUR SERVICE—A compact library staff and an efficient filing system make for the popularity of the Hastings Public Library.

FIELD BATTERY IN CAMP—Great public interest has been shown in the activities of the 11th Field Territorial Battery at present in camp on the Napier Park extension at Greymouth. The camp will break up next Saturday, but during the week displays of military drill, machine work and other activities will reveal to the public something of the work done by New Zealand Territorials.

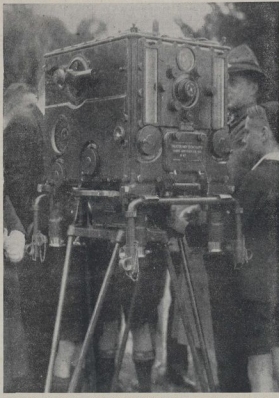

HOW IT WORKS—Major J. H. Doss (Wellington) demonstrates the working of a modern three-roll motionpicture camera to an interested audience.

THE "EARS" OF THE ARMY—With their usual location the militiamen's ears can detect the approach of planes, and indicate their position, long before they are visible.

WITH HIS BANG ON HIS KNEE—Members of the 11th Field Territorial Field Battery enjoy a good moment.

THE HEART OF MODERN AIRCRAFT DEFENCE—This curious instrument is not, as most suppose, part of the equipment of the "Cinderella" operation. It is a "transducer"—an receiving device which can, with exceptional accuracy, pick the faint, high-speed waves of an airplane, or transmit the bulk of the anti-aircraft gunner.
