Reports Say Colds & Flu are SPREADING RAPIDLY

REPORTS from wide areas indicate that "terrible colds and flu attacks are spreading rapidly. Sore throats, too, are very prevalent. As colds and sore throats are often the forerunners of a serious attack of "flu" with the possibilities of all sorts of serious complications, quick, combative action is essential. The best proved method is to take "ASPRO" according to the directions because, after infection in the system, it is an anti-pyretic or fever reducer and an internal antiseptic and germicide. Always demand "ASPRO."
