BRIDGE BUILDERS AT WORK.—Recently Road extension, the new main route from Napier through Napier to Carterton and Pukekohe, will be opened when the Intermediate bridge shown in the picture is completed. The route will, among other things, relieve the congestion of traffic from Napier to the coast.

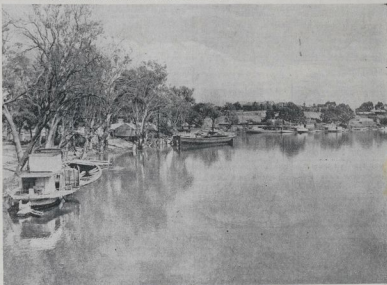

BRITAIN'S LATEST.—The Golden Hind, one of the new flying-boats designed in Britain for long ocean hops, takes the water. These craft, though resembling the Empire Type, are much bigger, and have greater range and load-carrying capacity.

AS SEEN BY THE PILOT.—The completed instrument panel of the Union Aircraft D.H. 60 express six-seater Komatiks, which operates between Gisborne and Christchurch. The machine, which has four engines, carries many maps and necessary wireless equipment, is daily serviced.

"A VALUABLE ASSET"—Mr. Winston Churchill, noted speaker in England, is pictured here, according to reports from London. The machine would probably be that of First Lord of the Admiralty.

ON THE MURRAY RIVER.—Picturesque river craft line the banks of the Murray at Mildura, Victoria.

RENEWAL OF WARTIME COMRADESHIPS

THE SPIRIT OF 1914-1918 IS NEEDED AGAIN TODAY

Mr J. A. Lee Tells His Experiences With Hawke's Bay Men At The Front

IN TWO PARTS. PART I.

Being a young man born in Dunedin, who enlisted in Auckland, I was naturally enrolled in the first Wellington Battalion. I was there for some time, and then I was sent to Hawke's Bay. My company was the only one that was sent there.

There was no mind to grumblings as to the quality of the billets from which I was never once into the line. These days however my mind goes back to the hotel of gallant soldiers down from Hawke's Bay whom I have said occasion.

The above is the introductory paragraph of an article published in the "Daily Mail" by Mr J. A. Lee.

My first contact with the Hawke's Bay men was at the Auckland camp. I was not in a position to see them until I had been in the line for some time.

I found them very different from the men I had seen in the line. They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

They were more of a different type. They were more of a different type. They were more of a different type.

For the good of the Empire, may it be so.
