Thrill for Visitors to Wellington

The Magic Multiple-Unit Electric Train Although it is a year since the modern multiple-unit electric train began running between Wellington and Johnsonville, it is still a novelty, to be enjoyed by visitors.

The train glides so smoothly through pleasant landscapes that a passenger may well be loath to leave the very comfortable seat at the end of the journey.

This train is a wonderful exponent of human ingenuity. Unquestionably it shows that in progressive policy the New Zealand Government Railways are not lagging behind the railway enterprises of Europe or America.

When the "Daily Mail" commenced operations it was recognised that the important thing was to get the paper to the readers as early as possible and to do so without delay. This meant that at a later stage additional capital would be required, but it was felt that it was better to do this earlier than would have been the case had the whole of the authorised capital been sought.

Mr Mulholland Reviews Situation

Special to the "Daily Mail"
WELLINGTON, July 11.
"The political situation today is one that requires very serious thought from the part of farmers. So far, a representative Parliament is concerned, the Government have done nothing at present almost clear-cut losses years ago, compensation the president of the Farmers' Union (Mr W. W. Mulholland) in the course of his address to the local farmers' association today.

"It is claimed by some that there is in fact now a Country Party in existence. Let us examine the position. Today we find the Labour Party, which contains quite a number of farmers. The Labour Party is not a Country Party for the farmer, at all events in respect of farmers' interests. The aim of this action is complete State control of everything if not Communism.
