Surprise Attacks By German Patrols In Heavy Rain And Mud TROOPS OF HIGH QUALITY IN ACTION

French Poilus Leave Trenches Cheerful And Undefeated

United Press Association—Copyright.
Received Oct. 12, 13.30 a.m.
LONDON, Oct. 11.—A French communiqué states that enemy patrolling in the vicinity of the Belgian border, were again repulsed during the night south of the Saar region and north of Luxembourg.

"The Poilus' spirit" says there is no doubt of the high quality of French soldiers on the way back to their units from a fortnight's fighting in the West, who have been returning their trenches, the little pots being today untroubled by what they have experienced in their frequent collisions between themselves and their spurs. The French soldiers say that the fighting has been very heavy during the last few days.

On the other hand, the French do not give much credit to German spurs. The communications, they say, have been cut off at many points and are only in the hands of a few stragglers. Some of the stragglers have been seen running through the woods, some of them carrying wounded men. The French describe the German communications as being very poor and say that the communications are very poor and that the German troops are very tired.

It was stated by the German press that the German troops had been very successful in their operations against the French, but that the French had also been very successful in their operations against the German troops. It was stated that the German troops had been very successful in their operations against the French, but that the French had also been very successful in their operations against the German troops.

The German press has also reported that the German troops had been very successful in their operations against the French, but that the French had also been very successful in their operations against the German troops. It was stated that the German troops had been very successful in their operations against the French, but that the French had also been very successful in their operations against the German troops.

The German press has also reported that the German troops had been very successful in their operations against the French, but that the French had also been very successful in their operations against the German troops. It was stated that the German troops had been very successful in their operations against the French, but that the French had also been very successful in their operations against the German troops.

The German press has also reported that the German troops had been very successful in their operations against the French, but that the French had also been very successful in their operations against the German troops. To every woman who finds difficulty in buying a smart, exclusive shoe that will give perfect comfort . . . let methods of fitting men. You will be under no obligation to buy.

We have certainly gone gay this season . . . Wonderful things have been happening to Shoes. Silhouettes are changing . . . Heels are "out" this season—foots, too . . . cutaway sides and cutaway backs . . . they're all here . . . so openly chic . . . stripped away lines, often filled for contrast.

And colours—your classes of Navy, Brown and Black, of course; but gay colours grow, and this season you must look for Japonica, Briante Green, Marifone Blue . . . in fact all the colours and combinations of a Rainbow.

And remember—Fashionable Feet no longer need suffer; the shoes most famous for comfort are to-day at the top in fashions.

Half A Million Dollars

NEW YORK'S SAVING

Sluful Shopping Lessons The Bills

The city of New York saved more than half a million dollars last year through careful shopping and improved purchasing methods. Mayor LaGuardia has estimated that the city saved \$500,000 last year through careful shopping and improved purchasing methods.

The great success of the city's shopping lessons was due to the fact that the city officials were able to persuade the public to buy more wisely. This was done through the use of shopping lessons and the distribution of shopping guides.

It is something that a group of people who are interested in the welfare of the city should know. The city officials are doing a great deal to save the city's money, and we should all do our part to help them.

THE WEAKNESSES OF THE SIEGFIED LINE Hastily Constructed Work Is Manned By Unreliable Soldiers

Any defensive system which Germany's Siegfried Line, which the French are now assaulting, depends for its strength on the men behind the guns. If these can be overcome the Siegfried Line differs greatly from the French Maginot Line, which is undergirded by a concrete and steel structure. The Siegfried Line is a hastily constructed work, manned by unreliable soldiers.

The German Government has been unable to put the Siegfried Line to a practical test. The line is still under construction and is not yet ready for a full-scale assault.

The French plan to attack the Siegfried Line. They have gathered a large force of troops and are ready to move at any moment.

The German High Command is aware of the French plan. They are taking steps to strengthen the line and to prepare for a possible assault.

The German High Command is also aware of the French plan to attack the Siegfried Line. They are taking steps to strengthen the line and to prepare for a possible assault.
