NEW BARRAGE KEEPS NAZIS FROM LONDON

Shells Hurled Up To 22,000 Feet

MIDLANDS HAS LONGEST

Slight Damage Reported

(United Press Association-Copyright.) (Received Sept. 13, 11.45 p.m.) LONDON, Sept. 12.

The "Daily Mail" says that the London anti-aircraft batteries are using guns of at least six different calibres up to 4.5in., which is the most deadly of all the anti-aircraft guns. Secret new types of shells have hurtled to 22,000 feet,

the explosions rocking the ether over a wide area. Heavier guns have put up a box type of barrage which is sent up in squares from many sections, while the light guns terrifically barrage raiders attempting to dive-bomb

Of these guns the Bofors are the deadliest. Uncanny electric predictors enable the gunners to harass

Britain's anti-aircraft defences have not been weakened in any district to provide London's barrage, which can be increased if necessary.

Raiders dropped a number of incendiary bombs in the north-west suburbs, then their 'planes droned towards central London, where the gunfire rose to a shattering roar, rattling the windows and spraying shrapnel on the rooftops and streets. Then followed a long interval of silence, suggesting that fewer 'planes were participating or that the barrage prevented penetration of the outer defences. The Midlands had its longest raid of the war, extending for several hours. High-explosive and incendiary bombs were dropped over a wide area. A mental hospital was hit.

RUGBY, Sept. 12.
The impressive scale of the recent Royal Air Force attacks on military objectives can best be appreciated from a summary of the number of raids on specific targets. Since the beginning of September until Wednesday morning—the period during which the brunt of the Nazi attack has fallen on London—the R.A.F. have carried out 23 separate attacks on German-occupied aerodromes in France, 18 on German aerodromes, 10 on aerodromes in Holland and two on aerodromes in Belgium. on aerodromes in Holland and two on aerodromes in Belgium. during which many high-explosive bombs have been dropped, hits being secured on hangars. There have also been 15 raids on forests concealing military objectives, great tracts of the Black Forest have been set ablage and equal success. set ablaze and equal success has been achieved in Thuringia, Ober-nartz and forests near Berlin,

Thirty-five attacks have been made on the German rail system, including the large Potsdam station, Berlin, and considerable damage has been caused in marshalling yards, sidings and to tracks sidings and to tracks.

Barges Broken Up

Twenty-nine raids on German and German-occupied docks and ship-yards have resulted in big fires and explosions,. Twelve raids on barge concentrations, five attacks on canal and river systems, and 14 raids on munition works, among which was Krupps, have also resulted in much

Rrupps, have also resulted in much damage.

Eight attacks on aircraft works include raids on the B.M.S. factory at Munich.

Sixteen raids on oil refineries and nine raids on fire stations include the bombing of the West Charlottenburg station, near Berlin on two successive nights with many direct hits and numerous flashes and explosions resulting. Seven attacks on gun emplacements on the French coast and 11 attacks on shipping have also been made.

ACUTE SHELTER PROBLEM

(United Press Association-Copyright.) (Received Sept. 13, 10.15 p.m.)

LONDON, Sept. 12. "Despite nearly a week of intensive bombing, London's working-class mothers are still reluctant to co-operate with the Government and local authorities in the evacuation scheme," reports the London "Daily Telegraph." An official to-day declared: "We expected that a very large jump in the registrations would follow the mass air raids, but we are frankly disappointed.

"It is true that the registrations have risen from a few hundred a week to 1000 a day, but that figure is far less than was anticipated because a scheme was ready for the evacuation of 250,000 within a few days.

"Serious problems are arising from the use of public air-raid shelters in the outlying districts of London as nightly dormitories by people living in the severely bombed eastern areas. Thousands from the East End, also from the inner eastern suburbs, flock every evening into London's green belt, taking blankets, mattresses, and food, and fill the shelters when the sirens sound.

"They sleep as best they can and then go home in the morning. Many of these shelters were intended primarily for pedestrians who are caught in the street and not for

"Similar problems have arisen in the West End.
"Members of A.R.P. squads say that persons tour the shelters in the daytime and select the most comfortable."

DOMINION'S GIFT TO LONDONERS

Sum Of £100.000 To Help Victims Of Air Raids

By Telegraph—Press Association WELLINGTON, Sept. 13.

The announcement that the Government has sanctioned the immediate transmission of £100,000 (New Zealand currency) to the Lord Mayor of London's Fund for the relief of distress caused by German air raids was made by Lord Galway, as chairman of the National Patriotic Fund Board,

In a statement Lord Galway said it had been decided to make the grant in recognition and admiration of the wonderful courage and fortitude of the people of London during the most difficult times through which they are passing.

This finance would be provided by the National Patriotic Fund Board through its Dominion-wide organisation. Details of its allocation among the constituent patriotic authorities of the board were now being arranged, but, in order that New Zealand should make its gesture at once, the standing committee of the National Patriotic Fund Board had approved of the gift of £100,000. This includes the provision of £10,000 (sterling) made from the Sick, Wounded and Distress Fund by the Joint Council of the Order of St. John and the New Zealand Red Cross Society to-day.

THE IMMENSITY OF LONDON

HARD FOR RAIDERS NOT TO HIT

Some Interesting Sidelights

When German bombers fly at a great height over London they will, if they are anywhere within the correct area of 730 square miles, be above part of their target, for that is the extent of the ground covered by Greater London. In this, the world's greatest city, there dwell 8,650,000 souls. It is reckoned that 2,749,000 Londoners go to work every day, of whom more than 500,000 are employed in distributive trades and nearly 250,000 on building and public works.

To serve this multitude there are some 4700 Post Office telephone public call offices and 256 telephone exchanges. When German bombers fly at a

exchanges.

Local Government For the local Government of London there are a number of authorities—the Corporation of the City of London, the London County Council, the Metropolitan Water Board and 28 borough councils. The March, 1939, Budget of the county council was for £35,972,043. To that time the council had spent £61,390,

Some idea of the diversity and immensity of the L.C.C.'s activities may be gained from the following: The chief officer of supplies may be said to keep house for the largest family in the world. He is responsible for more than 100,000 patients, immates and staff housed in the inmates and staff housed in the council's institutions and for 900,000 teachers, students and children. In a given year the council bought 10,000,000 eggs, 2,267,000 aspirin tablets, 2,207,000 cigarettes, 19,607, 000 envelopes, 27,000,000 pints of milk and 275 pigs a week. All told, Recordings. 3.0: Commentary on Rugby football match. 4.30: Sports with an annual wage bill of £17,619,-

Traffic Density

London's traffic is the greatest in the world and its bus, train, and tube system the most extensive and best organised. Almost the whole best organised. Almost the whole system is controlled by the London Passenger Transport Board. There are approximately 5000 buses and 25,000 drivers and conductors on 200 routes. In a year the board carried 4,317,979,132 passengers, and its receipts from traffic were £32,578,074. There are about 700 railway stations in Greater London, 7800 taxis and 250,000 private motor-cars. London's busiest crossing is Hyde Park Corner, with an average of 80,536 vehicles in 12 hours.

The docks have a water area of

The docks have a water area of 750 acres, with 45 miles of lineal quayage and 10 graving docks. In a recent year a total tonnage of 62,168,833 arrived at and departed from the port. London has more than 1500 churches and chapels and other facts are that Londoners in other facts are that Londoners in-sure against fire for £2,285,191,999, that the cost of maintaining 2275 miles of streets is well over £3,000,-000 annually, that there are 4945 public houses and beerhouses, 858 places of entertainment and 9470

Louis Hayward, Brian Aherne Starred

An unforgettable story, brilliant rmances, outstanding direction beautiful production make Edward Small's film version of How-ard Spring's "My Son, My Son' one of the finest pictures of the year. This new film drama, which is being released by United Artists, is now reening at the State Theatre, Has

My Son, My Son!" has a brilliant array of stars in Madeleine Carroll, Brian Aherne and Louis Hayward, trio who enhance the picture by own-to-earth, unforgettable acting others who give excellent perform nees include Henry Hull, one of the best contemporary actors, Josephine Hutchinson, Laraine Day, Sophie Stewart and Bruce Lester. Witn his sual skill for maintaining swift empo and clear characterisation, Charles Vidor has directed "My Son My Son!" with a remarkable sureness of touch and with unsurpassed clarity of insight.

The story is rich in emotional im-plications and everyday drama. It concerns a father and a son, and the gh hopes that fail to materialise. illiam Essex's dreams for his son do into thin air when he realises at Oliver is a vain and selfish oung man, over sophisticated, in-ncere and cynical. Oliver realises lmost too late that he has brought nisery to the people who have sur-ounded him with love and under-

tanding.
Golden-haired Madeleine Carroll, portraying the role of Livia Váynol, has never turned in a screen characterisation to equal her present one in this picture; Brian Aherne and Louis Hayward, as William and Oliver respectively, play their parts with understanding and humanity which points up the story brilliantly, and the other members of the cast in the supporting roles make many notable contributions.

"HELL'S CARGO" FINE NAVAL DRAMA

"Honeymoon Deferred" Bright Mystery

Again the sea is the stage for a remendously thrilling picture, and 'Hell's Cargo," now at the Cosy Theatre, Hastings, provides some of the most realistic action seen for many a long day. Three naval offi-cers, British, French and Russian, are aboard a French destroyer sent to detain a merchantman who has left an international port without permission. Its cargo is an acid which, in contact with sea water, produces a deadly gas

The cargo is jettisoned and the death cloud bears down on a liner bearing hundreds of civilian passen gers, among them the French offi-cer's wife and child. The French destroyer makes a rescue dash through the gas, scenes in which the dramatic tension heightens to an almost unbearable pitch before daylight is seen again through the choking cloud. At the head of the Robert Newton, Walter Rilla and Kim Peacock.

Double portions of mystery, action and comedy are contained in "Honeymoon Deferred," which is the second feature. Edmund Lowe and Margaret Lindsay in the starring roles appear as the detective and his bride whose honeymoon is interrupted by the suspected murder of Lowe's wealthy employer. Their adventures in solving the case lead them into a fast moving series of situations that give them ample op-portunity to display their talent for both dramatics and comedy. Elisabeth Risdon does outstanding work as the foster-mother of a family of rich children. The children themselves are ably portrayed by Anne Gwynne, Jerry Marlowe and Julie

THRILLING STORY OF SUBMARINES

Conrad Veidt In "U-Boat 29"

The headlines come to flaming life at the Regent Theatre, Napier, to-day, with Columbia's "U-Boat 29" providing in vivid actuality a picture of wartime England desperately battling enemy spies and submarines. Stirringly dramatic as "U-Boat 29" is, the new film is as remarkable for its vivid character studies as it is for its action-tense narrative and breath-takingly beautiful scenic shots

With Conrad Veidt, Valerie Hobwith Conrad veidt, Valerie Hobson and Sebastian Shaw featured, "U-Boat 29" is a story of world-wide significance, told, for the most part, in an out-of-the-way part of the world and concerned with only three major characters. Veidt is seen as an enemy submarine commander. an enemy submarine commander who leaves his home port under sealed orders, only to learn that he must make contact with a youn schoolmistress on one of the lonel Orkney Islands, to the north of the Scottish coast. She will have for him information of British fleet manoeuvres and he will thus be enabled to score a major victory over his foe. Safely arrived in enemy territory, Veidt locates the girl, and through her is introduced to a renegade British naval officer.

It is not until he believes that his mission is successful, that he need only return to his undersea and transmit his secret knowledge to others of his fleet that Veidt suddenly discovers he has been dealing with British counter-espionage agents. Aware that the information which had been given him was misleading, Veidt attempts to escape to his boat but is forestalled.

In the garb of an English clergy man, he boards a Scottish coastal vessel and with it goes to his grave when the vessel is torpedoed by his own submarine.

Veldt, one of the world's greatest creen actors, is superb in the difficult role of enemy agent. An un-sympathetic role at best, he invests the characterisation of the spy with sympathy and understanding,

There can be few who have not read or, at least, heard of the popular story "The Stars Look Down," by Dr. A. J. Cronin. This grand lar story "The Stars Look Down," by Dr. A. J. Cronin. This grand story of the coal-mining industry and of the men who toil and sweat below the ground, made Cronin's reputation. arney. The greatest care was taken to apture the atmosphere of a typical nining village, and for this purpose the whole unit spent several days in the town of Workington when background scenes were shot. Realism is the keynote of the whole production, and it is this very ability to transport the audience into the life of this mining village and en-able them to share the fears and hopes of the miners that does much to make the film the gripping drama

it is.

The story, as is generally known, deals with the hopes and aspirations of a studious young miner, David Fenwick, who sacrifices his ambitions for pretty, shallow little Jenny Sunley, who lets him down in preference for the unscrupulous self-made Joe Gowlan. This human drama is being played out whilst the mine itself and its impending disaster looms in the background throughout the whole film. ARTISTIC DECORATIVE WORK AT SPRING FLOWER SHOW

Women's Part In Horticultural Society Show In Hastings

The artistic floral work done by the women of Hastings has always been the centre of much admiration and praise, especially as it is so often a very attractive feature of weddings, balls, and all kinds of meetings and other special occasions.

Needless to say, the spring season, with so many beautiful flowers, gives encouragement to all floral work, and these two reasons—lovely flowers and artistic fingers—combined to make the women's decorative section at the Hastings Horticultural Society's spring flower show, held yesterday in the Assembly Hall, the centre of much admiration.

The only regrettable feature of the show was the fact that in the decorative classes the entries were small and one felt that many more women could have exhibited in these

New lines to learn ...

Wouldn't you love to be Anne who causes a ripple of envy wherever she goes . . . to the secret delight of her escort? The girl has line! No surrender there to the general gloom. We owe it to the men, says Anne, to look better than our best just now. Beauty has got to bear up . . . sailors do care! (Can it be, think you,

the captain's eyes have told her so?) If you'd like to be Anne look to Berlei for the brand-new torso . . .

There'll Always be an England

"What Hitler has done is to kindle a fire in British hearts here and all over the world . . . He has lighted a fire which will burn with a steady consuming flame until the last vestiges of Nazi tyranny have been burned out of Europe and until the Old World and the New can join hands to rebuild the temples of man's freedom and man's honour upon foundations which will not soon or easily be overthrown.

"It is a message of good cheer to our fighting forces on the seas, in the air, and in our waiting armies, in all their posts and stations, that we are a people who will not flinch or weary of the struggle, hard and protracted though it will be, but that we shall rather draw from the heart of suffering itself the means of inspiration and survival, and of a victory won not only for our own time but for the long and better days that are to come."

Rt. Hon. Winston Churchill, broadcasting from Rugby, Sept. 11

Confidence On The Home Front

The War for New Zealand—for our homes, and all that we hold dear—is being fought to-day in England.

Our frontiers are being defended to-day in England, and by our own flesh and blood, just as surely as if the enemy were at our own gates.

We have a reputation for hiding our feelings, for remaining calm and unruffled under great ordeals. Let us not assume too lightly the need of our time.

We are facing to-day the greatest crisis the world has ever known. The forces of evil are seeking to destroy our mighty heritage of freedom.

In the preservation of the British Empire lies the security of the world—preservation of the liberties of all nations—preservation from paganism, despotism, lawlessness, anarchy and injustice.

Those of us who cannot assist overseas must make the maximum effort in our respective fields. If it be an appeal for funds, let us give to the maximum and give cheerfully. Our sacrifice cannot compare even then with that of our fathers, sons and brothers overseas.

The familiar demand, "Increased standard of living," must give way to that of "Increased standard of work." Production, Unity and Confidence must form the keynotes of the day.

Let us work, each in his own sphere, to the best of his ability, with one aim—"Victory."

"Work for Victory—each giving of his best—in the knowledge that our cause is right and we will win."

WASTE NOT, WANT NOT

The current campaign for the saving of waste material in the Dominion is worthy of the most enthusiastic support. The various types of non-ferrous metals have been categorised and the people are by now well aware of what is required along that line. These metals are of definite use for direct war purposes as providing many of the raw materials for munitions; but the national effort should not stop short at the collection of odds and ends of copper and brass and so

"God's Own Country" has so far been richly endowed by Providence with an abundance of this world's goods, and the surplus has been so great that the waste heaps all over the country still harbour potentially valuable material. All of that material which is more or less indestructible can be salved and put to good use in other forms, but it must be added that much of our surplus waste is destructible and has, in fact, been habitually destroyed in large quantities.

An enormous amount of material in this country has gone up in smoke-material which would have been automatically salved and used in other parts of the world. A glance at some of the notices in our local shop windows will serve to show that the shortage of paper is so acute that appeals have to be made to customers to preserve the wrappings so that they may be used more than once.

In this connection the suggestion may be made to the committees in charge of the reclamation of waste material that the question of the price which the paper mills are prepared to pay for waste paper should be taken up. As things are, it hardly amounts to the freight cost of sending the waste paper to the mills. The New Zealand paper mills, makers of the bulk of the wrapping papers, cartons, etc., used in the Dominion, import large quantities of pulp in the form of sheets, and this is the principal material on which they operate. Yet hundreds of tons of waste paper are burned or otherwise destroyed because the mills are not prepared to recompense the supplier for even the trouble of salvage.

Apart from metals, it is obvious that the paper shortage is becoming acute. Newspapers must so organise their internal economy that, so far as is possible, they sell what they print, with no spill-over of waste copies. Newspapers, again, after they have been read, should not become mere kindling material. As a contribution to the war effort, waste paper can play quite an important part. But there is little encouragement to save such waste paper if it is ultimately made a means of easy profit to those who are able to deal

The whole idea of such stringent saving of potentially valuable material is foreign to the mind of the people of the Dominion, and any observer who cares to look will see that even now there is no great evidence of a sense of urgency in the matter. It is apt to be classified as one of the patriotic hobbies of people who have not much else to do. But the use of a consecrated imagination should suffice to rectify such a shallow impression. In this particular regard, there is scarcely a man, woman, or child in the Dominion who cannot make a definite contribution to the necessary war economy by such

Keeping strictly to the question of waste paper at the moment, it can be said with confidence that the average household contains a great quantity of such material in the way of old papers, books, and magazines that would constitute, in the aggregate, an amazing total. What is needed is that some encouragement should be given to the owners of such waste to the effect that what they give will be a direct contribution to help the Dominion along in its effort to play its part in winning the war.

The point of these remarks is this: Waste paper is useful, but as things are it cannot be disposed of in bulk unless it is sold, because most of it must be re-pulped before it can be utilised. If the price received is hardly worth the trouble of baling and freightage, some other way must be devised of organising plant that can deal with it. Every business firm destroys valuable waste paper every day. If the committees in charge can think out some method whereby it can be collected and reconditioned, the results may be astonishing.

It may be on occasions difficult for the average householder to differentiate as between copper, brass, and zinc. But he has no difficulty in identifying paper. Given the proper impetus, the footpaths could be piled high with the paper contributions of the citizens all over New Zealand, and these contributions could find a better lodging place than in the incinerator.

U-BOAT TALES RECALLED

NAPIER MEN TELL THEIR STORIES

A surprising number of Napier residents appear to have had the experience of being on a ship torpedoed by a U-boat.

In conjunction with the screening of "U-Boat 29" the management of the Regent Theatre invited anyone who had undergone such an experience to attend a session of the film and there was an unexpected re-

sponse from the public.

One curious coincidence came to light. Mr. Bruce Barclay, of Kennedy Road, related his experiences on the Dunmore Head, which was sunk off the Irish coast in April, 1917, Mr. Barclay sailing 300 miles in a lifeboat which landed its sur-vivors on the coast near Donegal

The trip was made in a heavy sea and proved to be an unenviable experience. A few weeks later the same man was on the Esneh, which was sunk on May 31, 1917, and this time he was two days in an open boat before being landed in the Hebrides islands to the west of Scotland.

Reference to the Stone Fruit Standardisation Regulations which, among other items, provide for a payment of an inspection charge, was made by Mr R. Paynter at a meeting of the Hawke's Bay Fruit growers' Association in Hastings last night. Outlining briefly the most vital provisions of the regulations which are to come into force at the end of 1941, Mr Paynter said that a strong protest had already that a strong protest had already that a strong protest had already

Prime Minister's Eulogy Of The "Thumbs Up" Attitude

By Telegraph—Press Association

WELLINGTON, Sept. 13. Admiration for the spirit of the British people and their indomitable courage during the present bombing raids on London and other English towns and cities was expressed by the Prime Minister (the Rt. Hon. P. Fraser) in an interview

He expressed the sympathy of the New Zealand Government and that of the citizens of the Dominion with the relatives of the killed, injured, and homeless.

New Zealand shared the world-wide sorrow and regret at the fate that had overtaken so many thousands of the people of London, particularly in the working-class areas of

"One must feel the highest admiration for the spirit of the people of London and of the United Kingdom as a whole," said Mr Fraser. "I have personally received cables from friends in the areas bombed, and in them the predominant note was expressed in terms of 'thumbs up' and 'smiling through.' Similar evidence is available from all parts of Great Britain.

Great Britain.

"The British spirit found eloquent expression in the forcible and moving address of Mr Churchill, which was broadcast in New Zealand yesterday morning," continued Mr Fraser. "Every glowing word breathed the spirit and the indomitable courage of the British people and the fixed determination of the British Commonwealth.

"The Rt. Hon. Arthur Greenwood, in a broadcast from the British Broadcasting Corporation today, also expressed in striking and graphic fashion the soul of Great Britain. They both spoke for millions of people in the British Isles, while Dorothy Thompson also today, in a most impressive way, has voiced the sentiments of the overwhelming majority of the American whelming majority of the American people.

Resolve Strengthened "While New Zealand's sympathy with the victims of these bombing outrages is deep and sincere, the barbarous attacks on them strengthens the resolve of the people of this Dominion to put forward even greater efforts, if possible, side by side with the Mother Country and other members of the British Commonwealth in the fight against the monwealth in the fight against the evil thing called Nazism, and to carry on that struggle to final victure."

Mr Fraser said that members of the Government and all former col-leagues in Parliament of the High Commissioner for New Zealand in London (Mr W. J. Jordan) were relieved to learn that there were no casualties at New Zealand House and that the conduct of members of the staff through the trying time had been most praiseworthy.

Mr Jordan's Message The following cable message was received by Mr Fraser to-day from Mr Jordan:—

"I have to inform you that a de-layed-action bomb fell close to the office. All adjoining premises were closed by the police as unsafe to en-ter until the bomb exploded, I have made temporary arrangements elsewhere for urgent business affairs. The action and spirit of the staff are excellent."

Brilliant Meteor Last Night

SEEN AT HASTINGS

Distant Explosions Heard

Preceded by a most unusual lightening of the sky, a brilliant meteor travelled low across the sky before bursting into incandescent fragments at a point south of Hastings at 7.30 last night. Despite the bright moonlight, the meteor's light flooded the countryside and was seen from the north of Napier.

Evidence of the comparatively low altitude at which the heavenly visitor travelled was given by the fact that about two minutes after the meteor was seen to burst faint explosions were heard. People who saw the disintegration described it like the bursting of a rocket, white lines of light radiating slowly from the heart of the white slowly from the heart of the white

A Hastings student of astronomy, Mr L. M. Stevenson, who saw the meteor said that it was an exceptionally large and slow-moving one. Its height would be anything between 30 and 70 miles, he said, while its speed might be in the vicinity of 200 miles a second

tionally large and slow-moving one. Its height would be anything between 30 and 70 miles, he said, while its speed might be in the vicinity of 200 miles a second.

"Shooting Stars"

Meteors and meteorites are familiarly known to many as "shooting stars" while, in reality, they are masses of rock attracted to the earth from their meanderings in space. The earth each 24 hours is subject to a constant bombardment of these bodies, ranging in weight from pounds to several tons.

Upon entering the earth's atmophere they are travelling at an almost incalculable speed, and the resulting friction results in them being transformed to white heat. Thus as "shooting stars" they are seen streaking across the heavens, generally fading into nothingness before they have travelled far. A meteor weighing tons as it hurtles before they have travelled far. A meteor weighing tons as it hurtles into the earth's orbit may soon be reduced to pounds and ultimately be dissolved into dust some miles

be dissolved into dust some miles above the earth.

Occasionally a meteor strikes the earth, generally causing considerable damage, but this is seldom. A meteor which struck the earth in Northern Siberia several centuries ago obliterated whole villages and ago obliterated whole villages and flattened the forest for a radius of a hundred miles. Similarly, another giant visitor buried itself in the desert of Arizona, making a crater estimated to be miles in depth.

A protest against a report published in the Press of an interview given by Mr D. S. McLeod, a Hawke's Bay Fruitgrowers' Association delegate who attended the New Zealand conference in Wellington recently, was voiced by Mr A. M. Robertson at a meeting of fruitgrowers in Hastings last night.

Bad weather caused a delay in completing the approaches for the new bridge, otherwise it would have been opened some time ago. It is not intended to dismantle the old bridge immediately as was done in the case of the Redcliffe Bridge. It is thought that the old bridge will be of considerable use for some time for transporting material for filling purposes, as well as serving in the meantime as a stock route.

The opening of the new bridge realises a long-cherished hope of the Hawke's Bay County Council. Drive Proposed
The Sports Clubs' Committee agreed that money was necessary for the purchase of parcels, and it was decided to make an early drive for funds. The drive will take the form of an art union, the first prize for which will be £100, which has been given by an anonymous donor. There will be a second prize of £5, a third of £3, a fourth of £2, and two of £1 each.

A sub-committee

two of £1 each.

A sub-committee to arrange details for the art union was appointed the members being Messrs. L. J. Fisher, A. Kirkpatrick, E. W. Ormond and R. P. Tabley. Their first job will be to apply to the Minister of Internal Affairs for the necessary permit. It is expected that tickets will be available at an early date at 1/- each.

The committee was asked to handle the meat and produce stall at the next patriotic shop, and the Hastings Golf Club and the Hastings Football Club jointly undertook to see that the stall is well stocked.

Horticultural Show Held At Hastings

GENERAL HIGH STANDARD

The spring glory of Hawke's Bay was embodied in the profusion of beautiful blooms which graced the Assembly Hall yesterday, when the Hastings Horticultural Society held its seasonal show. Considering the wet nature of the spring, the standard of the blooms was remarkably high, and entries were strong in every section.

The entry and display in the narcissi section exceeded even that of last year, when the national show was held at Hastings. An unusually large entry was attracted to the miscellaneous section, making it a most attractive feature

COLLECTION TO-DAY

HASTINGS BOROUGH AND HAVELOCK

"The organisation is complete; all we need now is the people to play their part," said the chairman of the Hastings committee of the National Council for the Reclamation of Waste (Mr G. W. B. McCormick) yesterday, speaking of the collection of waste metals to be made at Hastings and Havelock North this afternoon.

Mr McCormick said that quite a large quantity of metal had already come to hand, amounting to about a quarter of a ton. As a result of his visit to Hastings schools during

the week the children of several have forwarded quantities of metal, particularly at Central and Park-

Mr McCormick made a further Mr McCormick made a lutring appeal for the people to search through old drawers and cupboards for the metals that are wanted. These are tin-foil, lead, zinc, brass, copper, bronze, gunmetal, aluminium. They are to be placed at the front gates of residences in readiness for the collection, which is to begin at 1.30 m.

Householders in Napier are reminded that the collection of waste non-ferrous metals will be carried out on Monday morning, and are advised to carry out a search of garage, workshop, junk-room and kitchen during the week-end. Most households can yield some waste copper, brass, aluminium, lead or similar metal, and even the smallest quantities will assist in the valuable contribution to the war effort. STATE MARKETING Conference Delegates Report

At Hastings Meeting

COOL STORE WANTED

A full muster of orchardists attended a general meeting of the Hawke's Bay Fruitgrowers' Association in Hastings last night to receive reports of delegates to the recent New Zealand conference at Wellington, and to discuss matters arising from the conference.

The most important topic was the disposition of the new season's fruit crop, and the marketing arrangements likely to be made. The crux of the discussion was contained in a question put by Mr F. Reid, who asked: "Has Mr Nash expressed his willingness to give the same price as last

In reply, Mr R. Paynter, one of the delegates, stated that Mr Nash had said he was not prepared to put forward a price proposal until he had seen the results from this season.

The other principal item was a resolution, moved by Mr A. L. Baumgart and seconded by Mr R. Paynter, which read: "That this general meeting of the Hawke's Bay Fruitgrowers' Association urge upon the Internal Marketing Division the extreme urgency of erecting up-to-date cool storage facilities in Hastings, more especially in view of the heavy pear crop now promising; and that a small sub-committee be appointed to interview Mr F. R. Picot, Director of Internal Marketing, in reference to this matter when next he is in this district."

At apher no account was taken of the donations were sums advanced by firms of the province and also by a criterion in assessing prices. Speaking in support of the motion, members made it clear that the question was regarded as one of great importance to the industry. Government Control

The opinion that the principle of Government marketing of fruit in the meantime was the only satisfacthe meantime was the only satisfactory method from the growers' point of view was expressed by Mr Paynter in his report at the meeting.

"It remains to be seen whether this will apply when the present crisis is over. I personally very much doubt it," said Mr Paynter.

Referring to the meeting with Mr Nash, Mr Paynter said that the Minister had given them a very good bearing.

own opinion is that Mr Nash's statement about growers making £1000 or more not receiving Government assistance was in the nature of an afterthought," said Mr Paynter. The Other Aspect

"However, Mr Nash certainly made the statement, and we must admit that a man in the position described should not get Government assistance; on the other hand he should not let the Government market his fruit as it has been doing."

Mr Nash wanted to make it quite clear that growers were not going to make big profits from the price granted, said Mr Baumgart.

In answer to a question, Mr Paynter said that if the Control Board and Federation delegates jointly considered that the proposed price was not acceptable, then the representatives would go back to their sentatives would go back to their own districts; if there the growers the previously ack'ledged.

It was in the smoking compart ment that the bilious looking party with the wall-eye let himself go. That was what he was there for. "Tell me," he bawled, "one good point about smoking and I will begin to smoke myself." The chap with the tweed cap began to reply but was howled down by the antitobaccoite with: "Arguments in favour of smoking go in one ear and out at the other with me." "And what's to prevent them?" demanded the man with the tweed cap. "Sure there's nothing there to stop them!" Amid roars of laughter the orator bolted, and took refuge on the carriage platform. It's frequently alleged by these anti-tobbacoites that the weed is so pernicious it's positively dangerous. Some brands are certainly like that, but it cannot be said of the five famous toasted ones—Cut Plug No. 10 (Bullshead), Cavendish, Navy Cut No. 3 (Bulldog), Riverhead Gold and Desert Gold, for toasting gets most of the nicotine out of them, and leaves them pure and sweet. And for flavour and fragrance where are their equals?*

Gaiety At Annual School

FANCY COSTUMES WORN

Once again the Otane Town Hall was a scene of much gaiety and fun when, on Thursday evening, the annual school ball was held, a large number of parents and friends, as well as a full muster of pupils, filling the hall to capacity.

The supper room had been attractively decorated with Union Jacks and small flags arranged in groups around the walls, the long tables being arranged with red, white and blue interlaced streamers and vases of lovely spring flowers placed at close intervals.

The music for the children's dances was played by Miss E. Ingleton, Mr R. Taylor acting as M.C., and both senior and junior pupils thoroughly enjoyed themselves, until the adults had their turn at 10 o'clock, when the children were entertained to a bounteous supper and soft drinks.

Nazi Invasion Fails

AMERICAN STORY

Suicidal First Attempt Made In August

NEWS FROM FRANCE

United Press Association—Copyright. (Received Sept. 12, 11.45 p.m.) NEW YORK, Sept. 11. The "New York Sun" says that

letters from French residents from independent sources in Paris and occupied France, reveal that a Nazi attempt to land troops in England in August failed disastrously.

The invading fleet, says the paper, started from St. Malo, France, in the expectation of landing on the west coast of England, but the attempt proved suicidal.

Two letters referred to the incident, both surmising that the news had already been published outside France. Both gave no details. They did not give the date, but one letter, dated August 28, referred casually to a "suicidal attempt at debarkation."

A letter from Paris from a French official acting as a liaison officer with the German Army stated: "Paris is full of German officers. They are having a wonderful time and hoping that they will be allowed to stay. Especially, they are hoping and praying that they will not be chosen to participate in another disastrous attempt to debark troops

PETROL RESTRICTION UNWARRANTED

Wairarapa Contention

SERIOUS EFFECT ON MOTOR TRADE

Petition To Be Presented

By Telegraph-Fress Association. MASTERTON, Sept. 12. The serious effect of the petrol restrictions on the motor trade and those employed in it was emphasised at a large meeting of engineers and garage and service-station employees embracing all parts of the Wairarapa. It was contended that in the light of facts the restrictions were not warranted.

were not warranted.

It was decided to present a petition and to forward the following motion to the Prime Minister:—

"That this meeting of motor trade employees, representing all branches of the retail motor in-dustry in the Wairarapa district, Territorial camp on the Dannevirke showgrounds.

Officers were elected as follows: Patron, Lt.-Col. W. W. Jefferd; president, Major E. N. Hogben; vice-presidents, Sir Alfred Ransome, M.P., Messrs E. Gibbard and W. J. Woods; secretary, Mr. F. O. Devlin; treasurer, Mr. J. F. Fletcher; auditor, Mr. A. J. Webber.

In addition, a large general committee was elected who will appoint an executive committee at their strongly urges the Government to give immediate attention to the matter of increasing and stabilis-ing the present petrol ration to private and commercial users. While realising that some measure of conservation is necessary, we would point out that our livelihood and that of thousands of New Zealand workers and families depend on an adequate supply of petrol and the continued existence of the motor trade in general."

WHY? Because Jesus has died and risen again. Upon this ground you may be saved, and upon no other. If you are to be saved, your sin's heavy load must be removed. If sin's heavy load must be borne. If sin's penalty must be borne. If sin's penalty must be borne, then Jesus must die; for sin's penalty is death. You could not bear that, you would miserably perish. Said the apostle: "Your sins are forgiven you"—not for your work's sake—not for your morality's sake—but for His Name's sake" (1 John 2: 12).

WHERE? The answer is simple. Anywhere. Mercy flows to-day—not through some shrine in a holy city, nor through the finger tips of some holy hands, but from a victorious and ascended Christ in heaven. He is accessible anywhere. Touch Him, in other words, believe on Him, and you shall be saved.

HOW? By Faith, and by faith alone. Scripture is conclusive upon this point. Salvation is not by works, nor by faith and works combined, but by faith alone. "Not of works, lest any man should boast." (Eph. 2: 9).

WHEN? There is but one wise answer: NOW, your soul over the little question when! "Behold—NOW is the day of salvation." (2 Cor. 6; 2). Come to Jesus—JUST NOW.

Pam's Letter

Dear Girls and Boys,—

As I am hoping to see quite a number of you this morning, there is not much that I have to write to you, because I feel we will be able to tell each other all our news.

However, to all those faithful Playmates who do not live in Hastings I send a special message. Next time you are coming to Hastings write and tell me, and I shall try very hard to meet you.

There is just one point which I should like to mention to-day. I very much prefer original stories and poems to those copied from books, though I do not expect jokes, riddles, or competitions to be original. I think there are a few Playmates who do not quite understand the meaning of the word original. This means that you must have written your story or poem by yourself and not copied even a very small part of it.

Original work always gains higher marks, so remember this when you are sending me your

"Happy," D.S.O., Otane: I shall make a special visiting day for you, "Happy," when you are in Hastings sometime. I am sorry to learn that your brother is ill. It will certainly make you more busy. I shall look forward to hearing lots about your ball.

"Daffodii," Hastings: I am very pleasel indeed to have you a member of our Playtime Club, "Daffodii," and you will see that your pen name is quite all right. We have just had a Spring riddle-me-ree so I won't use yours just at present but I think your riddles are splendid. NORA AMONG THE HILLS

Once there lived a little girl called Nora who lived in a small town among the hills. The town was in the South Island of New Zealand, about fifty miles from the sea. It had a river running swiftly along one side. The river had wide banks piled with thousands of round white stones. High hills, covered with thick bush, stood round the town. There was much gold buried in these hills, and because gold is found in streaks called "reefs," the own was called Reefton. -"Boss," Mohaka.

Why is Christmas like a letter R?

Answer: Because it comes at the full moon sailed into the heavens shedding a pale glow over the earth.

The night was pleasantly cool, with that delightful, nippy feeling in the air, which is so noticeable on a fine spring night. The air was fragrant with the deep blue of violets and jonquils which intermingled with the fresh smell of young grass. A plum tree, clad in white blossom, daintily displayed its beauty against the deep blue of the sky, like some lovely maid, dressed in a gown of white, yet perhaps more beautiful, because there was something ethereal, something To our fancy dress ball, To be held in the Mohaka haps more beautiful, because there was something ethereal, something mystical in its loveliness. The mystery is Spring, which brings in its wake, beauty, youth and fragrance.

THE SCHOOLBOY DETECTIVE

Story Of The Missing

Rob was looking at the shelves of books that lined the room up to the ceiling, and wondering which were the most valuable books in his uncle's fine collection when the were the most valuable books in his uncle's fine collection, when the bell of the front door rang with impatient urgency. Mr. Pearce had gone to the local garage to see about his car, which was in the gradual process of falling to pieces. The schoolboy detective was alone in the house, an old building set in a wide expanse of green lawns. Opening the door, Rob saw before him a small man with a deeplylined face. He spoke in a slow manner and seemed to be continually looking for something on the ground. He was peering at his boots when Rob asked him whom he wished to see.

"I'm Ledgemore," he said, as if surprised at the question."

The book was not of immense value, but, as it had been in Mr. Pearce's family since the day of publication, it was a great personal loss.

Rob felt himself responsible for the whole affair, and made up his mind to track down Mr. Ledgemore.

I had to rush away to my sister, who was dangerously ill. On unpacking I found this book. It must have got in by mistake. I intended to ask someone to return it to you, I know it is only an old book, but feel I must post it to you."

Rob looked up after he had read thus far and said: "Can you beat it? He didn't even KNOW it was valuable! We've had all his trouble and he wasn't a thief after all!"

Colombo Bay Set For Stakes

(By MOTUROA.)

First of the major spring meetings, the Avondale Jockey Club's meeting which opens to-day and concludes on Monday will hold wide interest for racegoers. The form of the majority of the Aucklanders was disclosed at the recent Pakuranga Hunt meeting, while most of the visiting horses raced at the Wanganui meeting last week.

The fields are very large, however, and this looks anything but an easy meeting for backers. The conflict between northern and southern form is likely to be confusing, and then, it is reasonable to expect big improvements in form at this time of the year. Avondale in the spring has usually provided many pitfalls for the punter, and this week-end may prove no exception to the rule.

After the recent rainy spell there has been a break of several days of glorious weather in Auckland and prospects are bright for to-day. The good times recorded in the final gallops indicate that the track will be in splendid order for to-day's racing.

Much interest will be taken in the Avondale Stakes, the first two-year-old classic of the season. However, with the Avondale Guineas to be decided on Monday, the running of Lou Rosa, Gay Miss, Phaleron, Marshall Hall, and Queen City in the Flying Handicap and the form of Beau Leon and

company in the Champion Handicap will be closely watched. WIN-AND-PLACE betting will well but may be in need of a race be used at the meeting and and Royal Appellant may be in the to-day's programme opens with the 11.30—

Our Jean is the logical favourite. She was a fine three-year-old and a winner of the Champion Hack Plate here twelve months ago. Her second at the Pakuranga Hunt meeting shows that she is well forward and she should be all the better for that race. Flying Acre has been very consistent. He just failed to reach Te Kawiti at the Pakuranga meeting.

Kena is well seasoned, but Gamos has accepted in place of his stable-mate Te Kawiti. The Te Aroho Herries Memorial Cup winner is un-doubtedly first class when right. Er-lick is useful and so is Valamito, while Mintlaw is coming down in the weights again.

The Cardinal won this race last year and his good effort in the sprint at the Pakuranga meeting shows that he is in good nick. Coronation, Kelly and Silver Glow will not be entirely neglected, but the pick of the lightweights should be Clinch, who impressed at New Plymouth as being an early winner.

TO-DAY'S FIELDS ARE GOOD

Winning Rival Engaged In Main Event

By "Moturoa"

Considerable interest will be taken in the re-appearance of Royal Chief at the Ashburton Racing Club's meeting to-day in view of his spring programme which is to embrace the Wellington and N.Z. Cup meetings. The Chief Ruler horse has a solid impost in the Spring Handicap, and the distance may be a trifle short to enable him to show his right form to-day. Another interesting horse in this race is the Derby candidate Shikari.

The Ashburton Handicap looks a very open race, Sovereign Lady does not do much racing, but she is very well at present and she may see out ten furlongs better than Swordstick.
The Wrecker should do all the better for his recent racing, while this event should indicate Winning Rival's Oaks chances.

Settlement is always liable to sur-orise, while Glenora Boy left the impression at the National meeting that he would not be long striking form. The ex-North Island galloper Entail has been working well, but the pick of the lightweights should be the consistent The Raker, who

CURRENT COMMENT

(By MOTUROA).

Southern reports indicate that the Bulandshar colt Shikari makes a noise when galloping. This does not affect his ability on the tracks and he is reported to be well forward for the Ashburton meeting.

After his good form at Trentham the Surveyor colt Airport was backed for a certainty at the Rotorua meeting, but he just failed to get up to fill a place. He should be in the money this week-end at Avondale.

NOTHING could have been more impressive on Satur-day than the Debutante Stakes more impressive on Saturday than the Debutante Stakes winner Tetratina, yet I heard some critics say that nothing good ever won the first of the season's classics: Not many have been real champions, I will admit, but Surmount was a high class colt and he was not even in the class of the Posterity horse Legatee, who won this race in 1934. Legatee, who is now standing the season at Mr. H. Hassall's Soutra Stud, went on to win the Great Northern Foal Stakes and the following autumn he raced in Australia, where he was accounted unlucky in not being closer than third to that great colt Young Idea in the A.J.C. Sires' Produce Stakes. Knocked back at the start, Legatee was 12th, at the half mile and seventh into the straight. An Australian writer reported that seventh into the straight. An Australian writer reported that he "simply flew from the Leger . . he appeared to be a good thing beaten." More will be heard of Tetratina this season —"Motures"

SIRES OF THE SEASON

To Stand at the Karamu Stud, Hastings b h BULANDSHAR (5), 1929 (Imp.) (Blandford — La Douairiere) by Spearmint AVAILABLE FOR A FEW APPROVED MARES

Stud Fee: 100 Guineas b h LANG BIAN (3), 1932 (Fr.) by MASSINE 12 by Consols 3—Mauri by Ajax 2.

From FOREST TRACK by Tracery 19—Forest Lassie by Isinglass 3—Baroness la Fleche by Ladas 1—La Fleche by St. Simon 11.

LANG BIAN is a particularly handsome horse and closely resembles his famous sire. He was a good winner in the best class races in France.

MASSINE, Lang Blan's sire, was a high-class winner in France, and also beat the Derby winner Papyrus in the Ascot Gold cup. He has twice headed the winning sires' list in France and he introduces a fresh strain of St. Simon blood through that great galloper La Camargo.

FOREST TRACK'S pedigree is well known. Not only is she by that great brood mare sire Tracery, but her third dam is that wonderful mare La Fleche, the third dam of Beau Pere and Gay Shield, two of the most successful sires in New Zealand in modern times.
