# WE COMPILE AND PUBLISH YOUR FAMILY HISTORY

**E**VAGEAN Publishing was set up in 1991 by genealogists, Rex and Adriene Evans, to provide families with the opportunity to record their Family Tree in book form. They have written and developed a sophisticated computer programme which enables them to collect, assemble and print family data with accuracy and precision. The preparation of each book is carried out by themselves or by one of the skilled genealogists who operate under an Evagean Franchise.

Prior to publication virtually all living members of the family will have been sent a draft printout for checking and correction, thus ensuring the greatest possible accuracy and completeness. The books produced by Evagean are beautifully finished volumes of the highest quality. They will be displayed in your home with pride and will be a source of interest and fascination to your children and grandchildren. They will be ever more valuable with each passing year.

**E**ach book is a veritable Who's Who of your family. It will open little windows on the history of your family and will give you an insight and appreciation of the amazing contributions that your family have made to their community and their country.

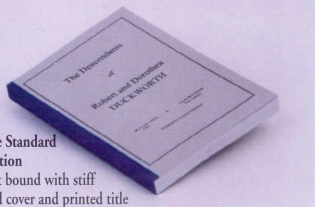

## Each book contains:
