Auckland, August 21st 1919

Mrs Green,
C/o Messrs Ward Bros.,
Rotonui,
Wairoa, HAWKE'S BAY.

Dear Madam,

The calf is apparently affected with a form of Eczema. This is brought about by change of feed, damaged or sour feed, etc. If properly treated it disappears quickly. It is best treated by giving a dose of Baking Soda in whisky. For a young calf the dose is:-

Baking Soda	1 teaspoonful
Whisky	2 tablespoonfuls

in half a pint of water.

Yours very truly,

C. Cumby

Editor.
